

Pop Up System

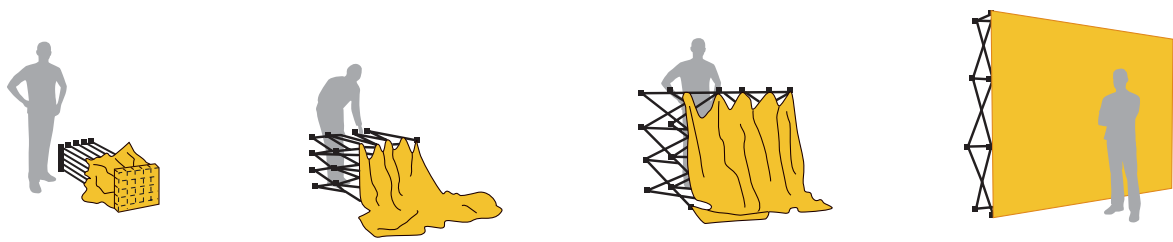

NetUpScreen

The most practical pop-up.

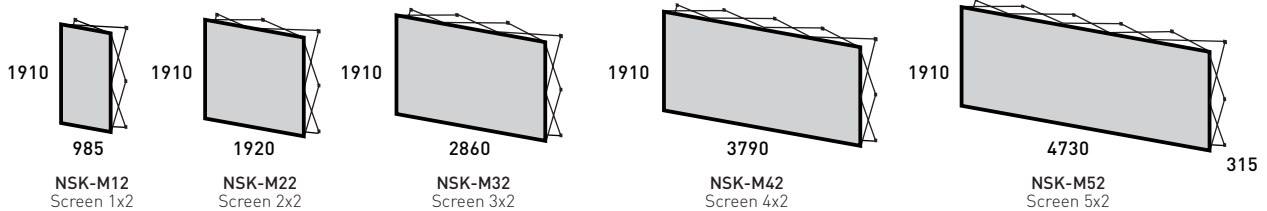

Screen is a straight pop-up with a reinforced structure, adapted like a frame that allows exhibiting one piece fabric or canvas images. Screen is totally modular and we can manufacture it in any size. It features a very efficient velcro system that allows the replacement of the image in only a few seconds. Do you know anything more practical?

PRINT TIPS

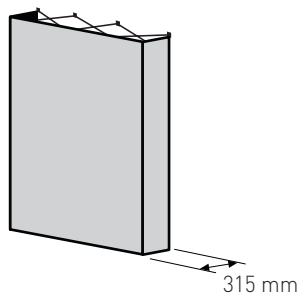

VELCRO FIXATION

VERY IMPORTANT:

The size of impression is nominal, nevertheless, we recommend a previous test of the behavior of the fabric or canvas that is going to be used. The perfect tension of the image can demand slightly inferior measures.

Printing the laterals

Add to the frontal measurement 315mm for each one of the sides.

VERY IMPORTANT:

The structure includes Velcro Tape hook on all its frontal perimeter.

In order to fix the fabric or canvas to the structure use High adherence Adhesive Velcro (loop) or Velcro to sew (not included in the kit)
